

COST Action CA18103 INNOGLY: INNOvation with Glycans new frontiers from synthesis to new biological targets.

WG1 Report

Report on the main advances in the field and developed activities related to WG1, the activities related to Working Group 1 (WG1 - Glycan-based correlations in developmental and cancer biology) have been listed and described below.

During this period the Objectives and Tasks of the WG1 have been addressed including publication of co-authored papers, organization of a workshop/meeting, short term scientific missions (STSM) and several dissemination activities as described below.

1) WG1 M 1.1: Workshop related to the topics of WG1.

- Obj1 INNOGLY: Develop a collaborative effort to achieve a common ground on the topics 1) Glycan profiling in health and disease, and 2) Glycan-based diagnostics and therapeutics, as well as the related subtopics.
- Obj 3 INNOGLY: Foster progress in existing research projects.
- Obj 10 INNOGLY: Bridge the gap between scientific communities with complementary knowledge and common interests in glycan-related topics.
- Obj 15 INNOGLY: Enhance public communication to boost promotion of glycoscience within the mainstream of biological sciences.

INNOGLY Annual Meeting. May 4-6, 2022 in Lugano, Switzerland. The meeting was held in the East Campus, houses the Faculty of Computer Science and the new Faculty of Biomedical Sciences of the Università della Svizzera italiana (USI). The WG1 leader presented the results and outputs of the WG, including the future planned activities. Ten WG1 members delivered oral presentations during the meeting. In addition, several members of WG1 had the opportunity to display a poster sharing their scientific expertise and available research tools. This event was announced on the INNOGLY website and on twitter.

INNOGLY COST Action Closing Meeting, May 2-3, 2023, Heraklion, Crete, Greece The Closing Meeting of the INNOGLY COST Action will take place on May 2-3, 2023, in Heraklion, Crete, Greece. The conference was held at the Atlantis Aquila Hotel, 2, Ygias Street, GR – 71 202, Heraklion – Crete. The WG1 leader presented the results and outputs of the WG, including the future planned activities. Ten WG1 members delivered oral presentations during the meeting. This event was announced on the INNOGLY website and on twitter.

2) Publications and conferences from WG1 members

Anderluh M, Berti F, Bzducha-Wróbel A, Chiodo F, Colombo C, Compostella F, Durlík K, Ferhati X, Holmdahl R, Jovanovic D, Kaca W, Lay L, Marinovic-Cincovic M, Marradi M, Ozil M, Polito L, Reina JJ, Reis CA, Sackstein R, Silipo A, Švajger U, Vaněk O, Yamamoto F, Richichi B, van Vliet SJ.

Invited lecture. Conceição, C. A.; Issoglio, F.; Almeida, V. T.; Rodrigues, J.; Archer, M.; Ventura, M. R. Synthesis of (oligo)arabinosides and development of a functional assay for the study of enzymes involved in mycobacteria cell wall biosynthesis. 14th International Meeting of the Portuguese Carbohydrate Group – GLUPOR 14, Caparica, Portugal, 16-18 January 2023.

"Studying glycan interactions using electrochemical impedance spectroscopy" INNOGLY COST-mini-symposium, Zoom platform; June 21, 2021.

"Studying metal ion mediated interactions of sulfated glycans derived biosensors" GlycosAminoGlycans: What remains to be solved? Hybrid Symposium; Faculty of Medicine, University of Crete, Heraklion, Greece; September 27-30, 2021.

"Glycan and peptide nanolayer-based biosensors" the NANO.IL.2021 Conference - at ICC Jerusalem, Israel; October 5-6, 2021.

"Biocatalysis and molecular recognition in enzyme biosensing" Institute of Electronic Structure and Laser (IESL) of the Foundation for Research and Technology – Hellas (FORTH), Heraklion - Crete, Greece, October 19, 2022.

"Glycan based electrochemical biosensors for enzymes: catalysis vs. recognition" 2nd General INNOGLY Symposium; Lugano, Switzerland, from 4th to 6th May 2022.

"Catalysis vs. recognition in glycan-based electrochemical biosensors" The 15th Bratislava Symposium on Saccharides (15th BSS), Smolenice Castle, Slovakia. June 20 - 24, 2022.

"Catalysis versus molecular recognition in enzyme biosensing" Workshop on Antimicrobial Peptides - The University of Melbourne, Australia; February 1-3, 2023.

"Conformationally Responsive Electrochemical Biosensors" MSE NTU Bioengineering tools for next-generation cellular agriculture, Singapore; March 6, 2023.

"Biocatalysis versus binding in enzyme biosensing" NUS FST Seminar on Cellular Agriculture, Singapore.; March 8, 2023.

Keynote Lecture "Biocatalysis versus binding in enzyme biosensing" Global Summit on Pharmaceutical and Medicinal Chemistry (PMC2023) -Lisbon, Portugal; September 21-23, 2023.

"Automated and accelerated glycan synthesis" 15th Bratislava Symposium on Saccharides. June 2022, Bratislava, Slovakia.

"Automated and accelerated glycan synthesis" 5th Glycobasque symposium. November 2022, San Sebastian, Spain.

"Automated and accelerated glycan synthesis" ACS Spring 2023. March 2023, Indianapolis, USA.

"Accelerated solid-phase synthesis of post-translationally modified peptides" ACS Spring 2023. March 2023, Indianapolis, USA.

"Electrochemical strategies for studying the effect of modifications on glycans binding preferences" ACS Spring 2023. March 2023, Indianapolis, USA.

"Developing Synthetic and Analytical Tools to Study the Effect of Modifications on Glycans and Peptides on Binding Preferences" Eurocarb XXI, the 21st European Carbohydrate Symposium, July 2023, Paris, France.

Research proposals/projects submitted by WG1 members are listed in the appropriate section of this final report.

Additional Outputs / Achievements

Patents

Yitzchaik, S., Hurevich, M., Shitrit, A.; Ben Abba Amiel, D.; "Glycosylated Amino Acids and Peptides as the Recognition Layer in Electronic Nose" US Provisional Application No.: 63/463,130; May 1, 2023.

Yitzchaik, S., Hurevich, M., Alshanski, I.; "Biosensors and Uses Thereof" – PCT Application No. PCT/IL2023/050634; June 19, 2023.
